PHYLOGENY LEADS TO ONTOGENY

(History - knowledge precedes development)

Forgive and love yourself, the pundits say,  
is an important station along "The Way".  
Forgiveness and love can only come after  
acquaintance in this dimensioned vale and  
sequenced trail.

Even as effect only follows cause ( the reverse  
being beyond the pale ) thus self acquaintance  
began long ago. Before your now body was hale.

Let the years roll back, peer through tears and  
peers to self acquaintance primal.

Forgiving and loving is a precious intimacy  
which transcends holding self from Self.

Forgiving self is concomitant to forgiving  
the world! Loving self is concomitant to loving  
the world!

Propinquity of self to Self provides what we  
need along the way. In the clear pale light  
of early self acquaintance iniquity is seen to be  
simple ubiquity.

To know the shining soul of all people is to forgive  
and to love all people. For both the poor and and those  
with plenty -phylogeny leads to ontogeny!

CHIAROSCURO

Two dollar words clog the mind  
They lie around like litter  
Yet often they do clear define  
The sweet among the bitter.

Some say love is sin  
But soul knows love is true  
Light and darkness abound within  
But is seen in Ki-or-os-kooree.
